

ELIF NUR TURK

Software Engineer | FullStack Product Development

Famagusta, Cyprus / Brussels, Belgium | elifnurturk.ent@gmail.com

| linkedin.com/in/elif-nur-turk-333319196 | github.com/elifnurturk | dev.to/elifnurturk | elifnurturk.medium.com

PROFESSIONAL SUMMARY

Fullstack engineer with a strong frontend focus, designing and shaping high-quality, scalable web platforms. Experienced in modern frontend frameworks and client-server architecture, solving complex technical challenges and optimizing performance. Adaptable and collaborative, with education and professional experience across Belgium, Portugal, Turkey, Cyprus, and the UAE, delivering effective solutions in diverse European environments.

CORE TECHNICAL SKILLS

JavaScript, TypeScript, React.js, Next.js, Vue, Nuxt, Node.js, Express.js, MongoDB, Postgresql, Redis, REST APIs, Docker, CI/CD, Nginx, apache2, Distributed Systems, Real-Time Systems, Web Performance Optimization, Core Web Vitals, Technical SEO, Socket.IO, Pinia

PROFESSIONAL EXPERIENCE

Software Engineer (Contract) — Client Project via La Borchenne (Brussels, Belgium) | Mar 2026-Present

Full-stack engineering services delivered via Brussels-based contracting company La Borchenne.

Development of scalable web platforms and production systems with focus on performance, system reliability, and modern web architecture.

Software Engineer - FunHi (Dubai, UAE) (Remote) (Aug 2025 – present) (8+ months)

Architected server-client component boundaries in Next.js isolating server-rendered layouts from interactive client shells with lazy loaded chunks to optimize hydration and runtime performance. Improved performance and production readiness of a distributed Web3 platform. Reduced client bundle size from

3.7 MB to 1.3 MB despite heavy Web3 dependencies. Engineered backend image delivery pipelines achieving up to 8x faster mobile performance. Supported real-time system architecture using Node.js, TypeScript, and Redis.

Implemented production-grade SEO, accessibility, internationalization, and Core Web Vitals improvements.

Software Development Specialist - Salamis Bay Conti Resort Hotel (Cyprus) (On-site) (2 years 2 months)

Architected and optimized a high-traffic web platform (500K+ users/year), reducing JS bundle size 3.5MB → 333KB. Managed frontend, backend, and containerized deployments (Docker, VPS, nginx, Apache2, CI/CD).

Delivered enterprise systems, automated workflows with Python, and led software integrations, achieving 98+ performance on Core Web Vitals and 100 SEO, accessibility, and best practices scores.

Software Engineer - Sefim (Ankara) (Remote) (1 year 5 months)

Built fullstack license management system with secure token validation, session control, and administrative dashboard for lifecycle management. Developed MERN backend with Node.js, Express, and MongoDB including role based access control and modular business logic.

Frontend Engineer - FurtherSoft (Cyprus) | (Hybrid) (1 year 11 months)

Designed frontend component architecture using Vue and Nuxt. Delivered production UI integrated with backend APIs and real-time system features.

Web Developer - Teknoza Digital Marketing Agency (Belgium) (On-site) (4 months)

Built and maintained WordPress websites from scratch including database design, E2E testing, optimization, and SEO improvements.

Frontend Engineer Intern ICS Defense (Ankara, Turkiye) (On-site) (3 months)

Developed responsive web interfaces for company platforms using modern frontend frameworks in an agile development environment.

Software Engineer Intern ZepLinX (Antalya, Turkiye) (Remote) (2 months) Implemented responsive mobile and web interfaces using Flutter and contributed to municipal mobile application development projects.

EDUCATION

BSc Computer Science Engineering - Kirikkale University (Turkiye) (2018-2023)

Polytechnic Institute of Guarda (Portugal) - Erasmus+ ExchangeSemester (feb-aug 2022)
